Traditional roots and innovative growth: Brothers and managing partners Helmut Link (left) and Joachim Link (top) are leading Interstuhl into the future.

INDIVIDUAL SELECTION

THE COMPLETE RANGE FOR INDIVIDUAL REQUIREMENTS

One of the aspects that makes Interstuhl so special is the flexibility and variety of its portfolio. Therefore, we of course continue to offer an extensive array of models, designs, materials and colours. With the **Individual Selection**, our partners and customers have a wide range to choose from within each collection – just as they always have done.

The Individual Selection is available to download in PDF format from the Interstuhl Partnernet: interstuhl.com/partnetnet

INTERSTUHL PLANNING DATA

EVEN MORE CONVENIENCE THANKS TO OAP! CONFIGURE DIRECTLY ON THE PRODUCT!

All commercial and graphical data from the Individual Selection is available in pCon.update. Thanks to OAP (OFML Aided Planning), using our planning aids is now even more convenient and intuitive. With immediate effect, it is now possible to make modifications directly on the 2D/3D model, even on complex products such as HUB configurations.

For further information, visit interstuhl.com/planning

FROM SWABIAN BLACKSMITHS TO INTERNATIONAL SUPPLIERS OF QUALITY PRODUCTS.

Interstuhl's story of success began in 1961 when two blacksmiths in the Swabian Jura started tinkering – as Swabians are wont to do. With their passion, expertise and hard work, they built the first chair to revolutionise the working world and take the strain off the human body.

What began as a joint venture between father and son 60 years ago is now a family of around 850 committed employees worldwide. Based in Tieringen, a district of the German town of

Meißenstetten, we are now one of the leading manufacturers in Europe. From our home, we supply the entire world with sophisticated and innovative products "Made in Germany".

Our knowledge and expertise, as well as our high quality standards and innovative spirit, drive us to continue achieving excellent results every single day. We always have a clear goal in mind: Offering our customers the best possible solution for their requirements.

For more information about our company, visit interstuhl.com

Splaces

SPLACES: WHAT'S IN A NAME?

SPLACES IS OUR ECOSYSTEM FOR NEW WORK

With Splaces, we confront the challenges of a new time, a new form of cooperation and a new world of work with a holistic concept.

To do this, we combine knowledge from the fields of architecture, science and user requirements with our many years of experience in the office environment. The objective is to identify and understand the challenges and requirements of the modern world of work and offer solutions that enable our customers – and all those involved in creating New Work Spaces – to write their own personal New Work stories.

Do you want to know more?
Visit interstuhl.com/splaces for
all the information about our
Splaces ecosystem.

HOW DOES THE IDEA OF SPLACES BECOME A TANGIBLE CONCEPT?

Together, we will develop a shared understanding for your starting point, your requirements, your wishes and goals. That means: We will ask questions, challenge existing beliefs, listen, observe and provide advice. We will jointly develop a clear definition of your personal New Work vision.

We achieve this by examining two components – architecture and ideas. The first consists of analysing stock and requirements. The second component is examined in a series of workshops and by surveying those who will later work in the new environment. In doing so, we only employ those components that are actually needed based on your current development status.

The results are evaluated and then prepared to serve as a basis for the subsequent planning phase.

Do you want to know more?
Visit interstuhl.com/splaces for
all the information about Splaces,
our new area of expertise.

On your chairs, get set, go! Welcome to the INTERSTUHL SPRINT express range. With Interstuhl SPRINT, you benefit from tried-and-tested models with extra-fast availability, optimum price-performance ratio, and 10-year guarantee. The maximum order quantity is limited to 40 chairs per customer per week.

With Interstuhl SPRINT, you benefit from preconfigured, tried-and-tested best-selling products with extra-fast availability, and a 10-year guarantee.

Remarks:

1 Felt glides for cantilever, transparent.

2 Row connector = chrome-plated, loop armrests & open armrests = same colour as frame.

The models with loop armrests are not stackable. Models with sled base frame are only stackable without armrests.

3 Base black or white = castors black, Base polished = castors chrome lock.

CASTORS

The rule of thumb here is:
 Hard floors - soft castors;
 soft floors - hard castors.
 For safety reasons, the EN applies to office swivel chairs;
 it states that unoccupied swivel chairs may not roll away.
 The rolling behaviour is heavily influenced by the composition of the floor. It is therefore necessary to coordinate the castors with the type of floor. In proper use, our castors deliver the necessary roll resistance as specified by DIN EN 1335.
 Make the right choice!

Remark:
 All listed castors possess brakes and comply with DIN 69131 and DIN-EN 12529.
 Other castors are available from our customer service department.

INSTRUCTIONS FOR USE: CASTORS / FLOORS

PARQUET FLOORS

Should not be walked on with wet or dirty outdoor shoes. Dust, stones, grains of sand, etc. can cause serious damage, particularly if these are pressed into the floor through loads, e.g. from shoes, castors of swivel chairs (some of these particles may be pressed into soft castors).

STONE FLOORS

Spilling drinks (cola, alcohol, etc.) and treating these floors with acidic cleaning agents leads to an etching and disintegration of the lime shares contained in the stone. This in turn leads to damage following additional pressure loads from castors.

LINOLEUM

Contains linseed oil, i.e. a fatty acid, as a raw material component. If basic cleaning is carried out with an alkaline cleaner (pH value > 10.5) the fatty acids together with the alkalines can cause a so-called saponification process. This produces soap that withdraws the main constituent of linoleum – the fatty acid – particularly in areas where the floor is subject to heavy loads (heavy through traffic, castors of swivel chairs, etc.) Strong discolorations, heavy wear, cracks and breaks may occur.

We cannot be held liable for any claims for compensation resulting from this type of use.

CARE INSTRUCTIONS FOR THE COVER FABRICS AND TABLE TOPS

To ensure that you enjoy your Interstuhl product as long as possible, please note the following care instructions:

Fabric

Regular cleaning maintenance: Please clean the upholstery at least once a month by using a vacuum cleaner with nozzle at low vacuuming power (500 watt) or brush in the direction of the fabric by using a soft brush. We would recommend using a professional cleaning company for linen or silk due to their delicate nature.

Stain Removal

Stains are best removed by using a fabric cleaner e.g. PURATEX or an intense cleaner from LCK. Please test the colour fastness on a hidden section of the upholstery first. Hereafter, please follow the cleaning product instructions. Please do not apply the cleaning product directly onto the upholstery, use a soft cloth. Please clean stains as soon as possible and always from the outside to the inside. In order to avoid any residual marks, please clean the entire area after this. Dab off moist stains with an absorbent cloth. We would like to ask you not to apply a lot of pressure when cleaning. The rubbing might change the surface of the upholstery.

For help with stubborn stains or marks, please visit our website (www.interstuhl.com/care) or contact our customer service team directly.

Leather

Leather is a natural product; it is unique similarly to the fingerprint of a person. Each leather hide has its individual character which is stretched for furniture. In contrast to fabric, leather is not as stretchy as fabric when used permanently or frequently. Therefore, the tension decreases and typically, wrinkles occur. Colour variations may also occur because the leather absorbs the colour differently. Our employees do their

very best to avoid colour variations. Please refer to "Manufacturing and Quality Regulations" for further information.

General Remarks

Please do not use any cleaning products containing solvent, shoe polishing or beeswax. Do not leave leather close to the heating. Please use special leather cleaning products only, e.g. KERALUX. KERALUX products from LCK were developed by tanneries and upholstery companies and therefore, fulfil high-quality furniture leather requirements. Please see www.interstuhl.com/care.

Maintenance

It is recommended to wipe the leather once a week in order to remove dust from pores. Every half year, please clean the leather thoroughly. Please use a product similar to KERLUX leather cleaning product set A or cleaning product set P (for Semi-Aniline leather or coated leather). Firstly, the leather is cleaned thoroughly, thereafter, moisturiser is applied to prevent the leather drying out.

Stain Removals

Leather stains can be removed with KERALUX intense cleaner. For special stain remover e.g. suitable for ballpoint-pen stains, please refer to www.interstuhl.com/care.

Synthetic leather

Apart from its appearance, synthetic leather does not have any characteristics in common with real leather. For this reason, it needs to be taken care of differently. Unlike real leather, which needs care and cleaning, synthetic leather needs cleaning only. This is due to its surface

coating (PVC, PC) which does not require any care substances.

Regular Maintenance

Please use a moist cloth in order to dust off the synthetic leather.

Cleaning

In order to remove stains, please use special synthetic leather cleaner from LCK. Please test at a hidden section first.

Protection

For light synthetic leather it is recommended especially to use an intensive protector from LCK. These products help to prevent the build-up of dirt in areas of abrasion caused by jeans for example.

Veneer

Maintenance: Please dust the veneer regularly using a dry, soft and lint-free cloth. Depending on the wood, please use special wood care products like SILVAPUR care set by LCK for varnished or oiled/waxed woods.

Laminates

Maintenance: Please dust the veneer using a dry, soft and lint-free cloth. Please use standard laminate cleaning products for stain removal.

Our customer service team is happy to answer any questions you may have with regard to furniture care. Alternatively, you can visit the furniture care page on our website at www.interstuhl.com/care.

GENERAL TERMS OF BUSINESS

1. General information

1.1 Our terms and conditions of payment and sale apply to all goods and services. Other conditions, e.g. customer terms of purchase, will only then become components of the contract if this is expressly agreed in writing. If the customer is a merchant or a legal entity under public law or a special fund under public law, our terms and conditions of payment and sale apply to all future transactions.

2. Contents of the contract

2.1 All information in catalogues, price lists or order proposals is non-binding. Only the terms agreed for a specific order are binding. Terms for an order are only considered binding once we have accepted the order from the customer (order confirmation). Suggestions we have made regarding an order only become binding after the order has been placed and confirmed.

2.2 Custom-made products are items that are not mass-produced or are not included in the price lists. This also applies to colour schemes.

2.3 The formation of a contract is subject to correct self-delivery. This does not apply if we are responsible for the missing or incorrect delivery, particularly if we have not carried out a congruent hedging transaction. We shall inform the customer immediately of any unavailable items and will refund any payments made without delay.

3. Prices

3.1 We shall quote our prices to merchants, legal entities under public law and public law special funds as gross prices minus discounts, plus the applicable statutory value-added tax, excluding packaging, transport costs, assembly and insurance. If there are more than four months between the formation of the contract and the delivery date, we are entitled to charge the price valid upon delivery.

3.2 For entrepreneurs and in the case of successive delivery contracts, we charge the current price valid on the day of delivery.

4. Transfer of risk

4.1 Our deliveries are carried out via FCA, Tiering – INCOTERMS 2020, insofar as no other arrangement has been agreed upon.

4.2 If shipment is delayed as a result of circumstances for which the customer is responsible, the risk is transferred to the customer from the day on which the delivery is ready to be shipped. In this case, we are entitled to store goods at the customer's expense and risk at our discretion and to request payment of the agreed price.

4.3 Customer claims as a result of a defect in the delivery must be based on immediate examination of the goods and notification of the defect after delivery – within seven working days at the latest – in the case of a recognisable defect. In the case of an invisible defect, notification must take place within this same period after the defect is discovered.

5. Delivery

5.1 If a date or time period is stated in or can be determined from the contractual documents for deliveries, e.g. a specific calendar week, this is when the delivery is due. The customer must ensure that the delivery can be received at least during normal business hours. For lead times or deadlines that must not be exceeded under any circumstances (fixed deadlines), this must be expressly agreed in a way that cannot be misconstrued.

5.2 If, due to force majeure, operational disruptions, strikes, lockouts, war, disasters and/or official interventions or orders, we are prevented from making the delivery and/or providing the service, we are entitled either to withdraw from the contract or to provide the agreed service as soon as possible after these obstacles are removed. There will be no compensation for damages in these cases. We reserve the right to not make a delivery where the credit rating is insufficient or not provided.

5.3 The customer shall be responsible for bringing the goods to the place of use and for

unpacking and setting them up. However, if the goods are to be conveyed by us to the customer, we are entitled to request payment for the work involved in providing this additional service.

5.4 Call orders are limited to a maximum of one year; during this time all deliveries must be accepted; the minimum recall period is one month.

6. Payments

6.1 Unless otherwise agreed, payments are due immediately and must be paid 30 days after the invoice date at the latest, without any deductions. Payment terms do not postpone the due date, but rather the latest possible payment date according to the calendar. If the payment is received within 10 days of the invoice date, we shall apply a 2% discount.

6.2 Bills of exchange and cheques will only be accepted if agreed upon, and only as conditional payment. If a cheque or bill of exchange is lost, we are not obliged to continue seeking payment from the document. Discount and bill of exchange charges and other costs are to be paid by our customer and must be settled in advance. Cheques will not be accepted as cash payment.

6.3 We have legal claims in the event of late payment.

6.4 The customer will only be entitled to offset if their counterclaim has been legally established or is undisputed. This ban on offsetting does not apply to counterclaims due to a defect based on the same contractual relationship as our claim. The customer is only entitled to exercise a right of retention insofar as their counterclaim is based on the same contractual relationship.

7. Retention of title

7.1 We retain the title to the goods until full payment has been received for all claims, including future claims, arising from the entire business relationship, including all ancillary claims. If there is an open account, the retained title acts as security for balance claims.

7.2 The customer is permitted to resell goods

owned or co-owned by us in the ordinary course of business. The customer hereby assigns to us all claims against their customers arising from the resale; we hereby receive this assignment.

7.3 The customer remains authorised to collect claims assigned to us. The customer must immediately inform us of any third-party access to our retained-ownership goods or to a claim assigned to us, particularly any attachments. The costs of any required interventions are payable by the customer. 7.4 We undertake to release goods to which the title has been retained, as well as assigned claims in accordance with Section 7.2, if the realisable value of the collateral exceeds 110% of the secured claim. This release shall be carried out via transfer of ownership or reassignment.

8. Material defects

8.1 If the goods delivered are defective, we will choose whether to remedy the defects or send a replacement.

8.2 Defects do not include technologically justified differences in dimensions or shape, laminate colour, material colour, or the colour and texture of the real wood veneer.

8.3 The customer undertakes to allow us access to the goods about which a complaint is being raised.

8.4 If deliveries are to be based on drawings or other information provided by the customer, we shall follow these instructions if they are technically feasible. We will not check whether they are feasible until a special order is placed.

8.5 The customer assumes liability that their commissioned order does not infringe upon the rights of any third parties. The customer's statutory rights of recourse against us only exist insofar as the customer has not entered into any agreements with their own customer which go beyond the statutory claims for defects.

9. Other claims, liability

9.1 Insofar as this is not contradicted below, there may be no other, ongoing claims by the

customer against us. This particularly applies to claims to compensation due to breach of contractual duties and tort. We are therefore not liable for damages not incurred to the delivered goods themselves. Most notably, we are not liable for loss of profits or other damage to the customer's assets.

9.2 The above limitations of liability do not apply in the event of malicious intent, gross negligence on the part of our legal representatives or senior employees or culpable breach of material contractual obligations. In the event of culpable breach of material contractual obligations, we are only liable for typical, reasonably foreseeable damage, except in the case of malicious intent or gross negligence by our legal representatives or senior employees.

9.3 These limitations of liability also do not apply in the event that liability is assumed under the Product Liability Act for personal injury or material damage to objects for private use in the event of defects in the delivered goods. It shall also not apply in the event of loss of life, physical injury or damage to health and in the event that a guaranteed quality is lacking.

9.4 Insofar as we have no or limited liability, this also applies for the personal liability of our employees, workers, colleagues, legal representatives and subcontractors.

9.5 This does not affect the statutory regulations regarding burden of proof.

10. Limitation period on claims for defects and damages

10.1 The limitation period for customer claims due to defective goods is one year. This does not apply if a longer period is provided for in accordance with Section 438(1) No. 2 (buildings, objects used in buildings), Section 479(1) (recourse claims) or Section 634(1) No. 2 (construction defects) of the German Civil Code. This also does not apply to claims to compensation which are based on compensation for bodily injury or damage to health, or on malicious intent or gross negligence on our part

or on the part of our subcontractors.

10.2 The limitation period for customer compensation claims which do not relate to defective goods is one year. This does not affect the limitation period of claims due to malicious intent or gross negligence as well as bodily injury or damage to health and due to the Product Liability Act.

11. Documents and samples

11.1 We reserve all intellectual property rights and copyrights for cost proposals, drawings, images, sketches and other documents and samples; the documents must be sent back to us upon request and must not be passed on to third parties, even as a copy.

11.2 Samples must be returned to us or purchased within a month unless otherwise agreed. Samples for custom-made products must be purchased by the customer and may not be exchanged.

12. Place of jurisdiction, applicable law

12.1 It is hereby agreed that German law will apply.

12.2 For all legal disputes, including in the context of processes for bills of exchange or cheques, our head office is the place of jurisdiction if the customer is a merchant, a legal entity under public law or a special fund under public law. We are also entitled to sue at the customer's place of business.

13. Data protection

13.1. The personal and company-related data of our customers is stored and processed in compliance with the EU Data Protection Regulation (EU-DSGVO).

TERMS OF SALE AND DELIVERY

This price list is valid from 1st January 2023. The publication of this list renders all previous price lists invalid. The delivery will be carried out in accordance with our General Terms and Conditions, about which you have been informed. Models from previous ranges and past price lists that are no longer listed are only available on request. The stated prices are non-binding recommended prices in € plus the applicable VAT.

Terms and conditions of supply

Our deliveries are carried out via FCA, Tübingen – INCOTERMS 2020, insofar as no other arrangement has been agreed upon.

Changes to orders

Changes to orders and postponement of delivery dates can only be taken into consideration if they are confirmed by us in writing. We reserve the right to add a surcharge in these cases. If we have to store products due to the postponement of a delivery, we will charge €1.00 per product per calendar week. Order alterations must be made at least 10 working days before the confirmed delivery date. (For tables: 5 working days after the order is received).

General information

Measurements

The measurements are determined according to EN 1335. The stated measurements are approximate values. Tolerances are permitted.

Colour differences

Colour deviations in upholstery fabrics or décors are due to production or, in the case of leather and wood, to natural causes. No claims may be made for slight deviations, particularly in the event of subsequent deliveries.

Orders

Minimum order information: Always state the basic model and the number of the cover. If the seat and backrest are to have different covers, please specify the seat first and then the backrest. Example: 152G/5800 – 5824. Options: If you want a different option than the standard one (the standard option is indicated by black dots), please state the corresponding order

number after the minimum order details. Options example: 172H/CI01 – 8010/601/703. Please use our order forms.

Castors and glides

All chairs/armchairs are fitted with castors for carpeted floors as standard (in accordance with DIN EN 12529). If the chairs are to be used on hard floors, please select the option "soft castors" or "felt glides for hard floors" when ordering the chairs. We cannot be held liable for the use of incorrect castors or glides.

Custom-made products

Interstuhl can only provide its exceptionally reasonable price-performance ratio by using rational production. Please clarify any special requests with us. We will add a surcharge here depending on the design required. The cover materials provided will be invoiced in price group 2 with a minimum order quantity of 10 items per model and order. When using customer fabrics

or customer leather, the usability of the cover materials must be checked using the provided sample before the order can be accepted. We cannot be held liable for the quality of the material delivered to us, nor for its processing or for any defects that subsequently occur. We generally assume a minimum width of 1.40 m for cover fabrics provided. It is essential that you provide us with processing instructions (particularly the direction of the upholstery as well as the front and back). We will gladly send you a form to fill in to this end.

The order shall only be entered and confirmed after the cover materials have been checked for usability.

Return and disposal

Interstuhl will be happy to assist, upon request, in disposing of products in an environmentally friendly manner. Any transport costs that may arise as a result of this are payable by the customer.

Interstuhl Büromöbel GmbH & Co. KG ("INTERSTUHL") offers a warranty for the guaranteed products defined here, subject to the following conditions.

The warranty applies in addition to and without prejudice to any legal or contractual entitlements and rights that the claimant has.

Guaranteed products are all products by INTERSTUHL with the exception of electronic/digital products such as sensors. The warranty applies to guaranteed products used in the country in which this price list is valid. The only person entitled to make claims on this warranty is the owner of the guaranteed product. Other persons do not have the right to make claims on this warranty. The warranty covers situations in which a guaranteed product suffers from a defect within the warranty period and a warranty exclusion does not apply. INTERSTUHL offers a long-term warranty of ten years (of which the first three years comprise a full warranty) from the date of production 1st February 2016, which can be found on a label on the underside of the product. During the full warranty period, all spare parts will be supplied free of charge including assumption of packaging costs. INTERSTUHL reserves the right to carry out repairs during the full warranty period, at the factory or on-site, or via and at the premises of authorised dealers and partners. Any costs incurred for unjustified warranty repairs will be invoiced. After expiry of the full warranty period, INTERSTUHL supplies all spare parts free of charge from the fourth to the tenth year as part of the long-term warranty. Costs for the duration of warranty work carried out at the dealer, the end customer or in the plant shall be invoiced, including the costs for transit times. These will be offered on request and in-

voiced separately. Wearing parts such as cover materials, foam parts (integral foams), upholstery, castors, surfaces of frames/bases and tables, edges and edge strips of tables are excluded from the long-term warranty.

Claims cannot be made on the warranty if the defect has been caused by the guaranteed product being installed, put into operation or transported incorrectly by or on behalf of the claimant; the guaranteed product being modified incorrectly (e.g. attempts at repair) by the claimant or by third parties that have not been authorised by INTERSTUHL; failure to observe safety regulations, operating instructions and installation standards; force majeure (storms, lightning strike, overvoltage, fire, etc.); The defect has been caused by use of a cleaning agent or care product not recommended by INTERSTUHL.

Only cleaning agents and care products recommended by INTERSTUHL may be used for maintaining and cleaning your item of Interstuhl furniture. (www.interstuhl.com/care) The defect has been caused by normal wear and tear, natural deterioration or environmental factors; The defect has been caused by the claimant requesting a deliberate variation on the standard product or by any materials made available by the claimant. The warranty periods apply for conventional industrial use, i.e. eight hours per day, 220 working days per year. In cases of multiple-shift operation, or use 24-hours per day throughout the year, the warranty period shall be reduced accordingly. If a warranty claim is made, INTERSTUHL shall remedy the defect – at its own discretion and at its own expense – by having the guaranteed product repaired by INTERSTUHL, a retailer or the claimant, or by supplying new or reconditioned parts. Spare parts shall be the property of INTERSTUHL. If an inspection by INTERSTUHL reveals that a warranty claim cannot be made,

and that the claimant could have known this, INTERSTUHL may charge a service fee for inspection and handling in accordance with its currently valid price list. The warranty period shall not be restarted or limited by acceptance of a warranty claim.

To make a claim on the warranty, INTERSTUHL requires the following information: Description of the defect, model name, model number, order confirmation number, delivery note or invoice document (if applicable). This information about the chair and table models can be found on the label on the underside of every product. If this information is not provided, INTERSTUHL may refuse to process the warranty claim. The warranty claim can be processed more quickly and easily if INTERSTUHL is sent a photograph and/or a short video together with the information stated above. A claim can be made on the warranty by sending this information to:

Interstuhl Büromöbel GmbH & Co. KG
Brühlstraße 21,
72469 Meßstetten-Tieringen, Germany
Fax +49 (0) 7436 871 88709
E-mail: info@interstuhl.de

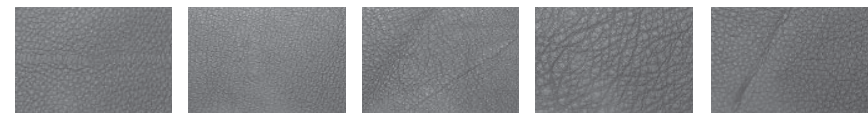

The guaranteed product must be sent to INTERSTUHL in its original packaging or packaging of equal quality. This warranty is subject to German law. If the purchaser is a merchant as defined in the German Commercial Code, a legal entity under public law or a special fund under public law, the registered office of INTERSTUHL in Meßstetten-Tieringen shall be the exclusive place of jurisdiction – including on an international level – for all disputes arising from the warranty, either directly or indirectly.

As of: 05/2019

The colour and veneer samples shown provide a true representation of the series colours and structures. Wood is a natural product. Veneers with different structures and colours are always used for the production of tables. As a result

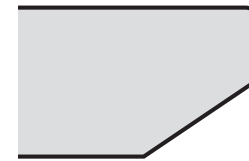

complaints about colour and structure deviations caused by the material cannot be accepted.

The variations and colours of the models you will find in the pricing table

of each product family. The Table also shows the relevant ordering reference number.
